CAREER OPPORTUNITIES – Goleta, CA

Junior Electrical/Antenna Engineer (Ref# 2105-E)

Toyon Research Corporation is an employee-owned small business engaged in research and development of advanced systems. Toyon is seeking an Electrical Engineer with experience in the design and test of antennas and RF systems. Join a dynamic team of creative engineers working on state-of-the-art antenna problems for radar, navigation, communications, electronic warfare, automation, and embedded sensors across the electromagnetic spectrum.

The position requires at least a Bachelors in Electrical Engineering, Physics or related discipline. A Masters is preferred. Mechanical Engineers with a strong understanding and/or experience with electrical engineering will be considered. Excellent verbal/written skills and the ability to think outside the box is essential.

Any of the following capabilities, or a subset thereof, will be highly valued:

- Antenna Design
- RF Design
- Estimation Theory
- Digital Circuit Design
- Analog Circuit Design
- Machine Learning
- Python, C, C++
- MATLAB
- Program management capability

Familiarity with standard computer-aided design and analysis tools such as Ansoft HFSS or CST Microwave Studio is highly desired. However, the ability to learn and embrace the use of such tools is of utmost importance.

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.
