CAREER OPPORTUNITIES - Santa Barbara, CA

Antenna & RF Intern: Mechanical Design (Ref #2112-E)

Toyon Research Corporation is seeking a current high school student intern to work in our Antenna & RF Systems team. This internship will involve developing the design and drawing package for a custom thermal fixture used in testing RF electronics without overheating them. As well as fabricating of some parts for the fixture either in-house or by a third party and testing and evaluating of the fixture's performance with a selected representative thermal load.

We are looking for students who have the following skills:

- Familiar with SolidWorks CAD software
- Knowledge of mechanical and thermal design
- Ability to work with electronic equipment to conduct testing and record data
- Ability to work with others to conceptualize and solve problems
- Machining skills are a plus

U.S. Citizenship Required. Ability to qualify for a US Department of Defense security clearance required.

Please e-mail resume to:
